

# Speed and versatility are an unbeatable combination

The new, fully automatic, T800 buckle folding machine from MBO allows format changeovers in less than one minute and the KL112 miniature folding machine from Herzog + Heymann can perform even the most difficult jobs at high-speed. Versatile and fast, these machines give you the best of both worlds.

- Folding units with up to 14 buckle plates
- 18mm minimum fold length
- Highly accurate complicated folding patterns
- Expansion options for special contracts

# Lightning Source™

## Winner: Lightning Source

Print-on-demand book manufacturer and distributor, Lightning Source was chosen as The Book Print Award winner, as it serves over 6,500 publishers globally and has to date printed over 55,000,000 books of the highest quality.

Over 650,000 titles are stored in Lightning Source's digital library, and it currently prints over one million books in its US and UK operations, with an average print run of 1.8 copies per title.

Speed and quality are Lightning Source's driving factors, through

the use of software that has been optimised for character and picture reproduction in Lightning Source's proprietary workflows.

Along with superior print quality, Lightning Source offers exceptional binding and finishing. It manufactures monochrome and full colour on-demand books in 16 trim sizes in multiple bind type options. Lightning Source also has a robust distribution network for sending books to publishers, retailers, warehouses or to international locations.

## Judges' comments

This was a tough category which including some outstanding work. Lightning Source is producing very high quality books on digital presses, making short run books accessible to people and keeping a great deal of literature alive. The quality of printing and binding supplied was excellent.
